	Missing Records	191

These tables are prepared by the New York State Insurance Department from data reported in the Insurance Expense Exhibits filed as of December 31 of each year. All caption headings relate directly to similarly described items in the Insurance Expense Exhibit and in Regulation No. 30 pertaining to the Uniform Classification of Expenses.

Individual company data are not printed for a company if, in a given line of business, its countrywide written or earned premiums is less than $100,000 and its New York State premium is less than $100,000. However, the total for such companies has been included as "remaining companies."

Certain groups of affiliated companies file consolidated Expense Exhibits. The data for the entire group is shown in only one of the affiliated companies. Such groups and companies can be found in the appendix at the end of this book.

The following definitions of the terms appearing in this book provide only a general guide. More definitive explanations are contained in the Department's Regulation No. 30 and in textbooks on insurance subjects.

Countrywide and New York State Experience

"Countrywide" data refer to the total business transacted by all domestic and other state (foreign) companies. In the case of alien companies, only the business conducted by the United States branch is reported. Countrywide are on a "net" basis after reinsurance.

"New York State Experience" refers to business written on risks located in New York State. New York State data are on a "direct" basis before reinsurance.

Expenses

Expenses are reported on a form ("Insurance Expense Exhibit") adopted by the National Association of Insurance Commissioners and filed annually by each company on or before May 1. The form calls for the allocation of all operating expenses to specified expense groups and to separate lines of business. The rules for Uniform Classification of Expenses reporting are prescribed by Regulation No. 30 of the New York State Insurance Department. The expense ratios shown in the published tables are described below. Investment expenses are excluded from all of the ratios shown. Expenses do not include Federal Income Tax.

"Expenses (adjusted)" ratio represents the sum of the five expense ratios reported under "Analysis of Expense (Countrywide)." It is designated as "adjusted" because the "Commission and brokerage" ratio and the "Taxes and fees" ratio are on a written premium basis while the remaining three ratios are on an earned premium basis.

The adjusted expense ratio, while it approximates expenses as a percent of written or of earned premiums, recognizes the differing bases underlying the incidence of expenses.

"Loss adjustment" expenses are all expenses incurred in connection with the investigation and adjustment of policy claims, including the allocated share of the operating expenses of the company pertinent to this activity.

"Commission and brokerage" expenses represent payments made or due on a commission basis (percentage of premiums) to agents and brokers for the sale of insurance, and expenses related thereto such as customer servicing.

"Other acquisition" expenses are all expenses other than "Commission and brokerage" expenses incurred in connection with the sale of insurance, including salaries and expenses for soliciting and procuring business, writing policies, collecting premiums, advertising, etc.

"General" expenses are all underwriting expenses incurred other than those allocable to "Loss adjustment," "Commission and brokerage," "Other acquisition" expenses, and "Taxes and fees." General expenses do not include investment expenses.

"Taxes and fees" are all taxes and fees except Federal Income Tax and real estate tax. This includes premium taxes, payroll taxes, licensing fees, expenses of Insurance Department examinations and other related expenses.

Losses

"Incurred losses" are all losses paid during the year plus or minus the net change in reserves set aside for outstanding (unpaid) losses. Loss adjustment expenses are excluded. Losses incurred ratios are based on earned premiums.

"Outstanding losses" represent the estimated amount not yet paid on losses incurred during the current and prior years, including reserves for incurred but not reported claims, claims in the process of settlement or investigation and amounts not yet due on adjusted claims. Loss adjustment expenses are excluded.

Net Gain

"Net gain (adjusted)" is the difference between net premiums earned and the sum of "Incurred losses" and "Expenses (adjusted)." A negative figure indicates an underwriting loss. Net Gain shows results before Federal Income Tax.

Premiums

"Direct premiums" are total premiums on all policies issued by a company. They do not include premiums received from other companies for reinsurance assumed and no deduction is made for reinsurance ceded to other companies.

"Adjusted direct premiums" (shown in Table 22) are "Direct premiums" adjusted in accordance with the following instruction in the Insurance Expense Exhibit:

"Where pooling agreements or similar arrangements exist between companies within a group and where companies operate through pools or associations and each company participates in the expenses on the basis of a fixed percentage, each company's direct premiums for the purpose of this exhibit, shall be adjusted to produce its participation in the aggregate direct premiums of the group and further adjusted by substituting for the actual direct premiums on business written through associations, the participation of the company in the aggregate direct premiums of all members of each such association."

The adjustment of premiums of companies in pools and associations places these data on a comparable basis with companies not so participating, for purposes of Insurance Expense Exhibit reporting.

"Written premiums" are premiums on policies issued by a company during the year regardless of the expiration dates of the policies, less return premiums on policies cancelled or not taken. (Written premiums may be on a direct or a net basis.)

"Earned premiums" are premiums on policies issued for that portion of the policy term which has expired during the year (e.g., for a one-year policy issued on December 1 of the current year, only one-twelfth would be reported as earned during the current year; for a one-year policy issued on December of the preceding year, eleven-twelfths would be earned during the current year.)

Premiums earned for a given year can therefore be computed by adjusting written premiums by the difference between the unearned premium reserve at the beginning and end of the year. The unearned premium reserve is a provision for the unexpired portion of the premiums written during the current and prior years.

"Net premiums" are the premiums retained by the company, net as to reinsurance. They differ from the "Direct premiums" in that they include the premiums received from other companies for reinsurance assumed and exclude the premiums paid to other companies for reinsurance ceded.

Investment gain

"Net investment gain or loss" includes realized, but excludes unrealized, capital gains or losses. It has been allocated by management to lines of business and to surplus in accordance with the method deemed by management to be most appropriate.

Table Notes

The following notes apply to all tables:

All ratios (loss, expense, and income) are expressed in percents.

Columns marked "E" utilize net premiums earned as the base. Columns marked "W" utilize net premiums written as the base.

Incurred loss ratios (New York State experience) that exceed +1,000 or -1,000 percent are printed as +999.9 or -999.9 respectively.

A "*" indicates that a company's ratio reported in its Insurance Expense Exhibit (IEE) differs from a ratio computed by the Department--based on the dollar amounts reported by the company in the IEE--by more than ±1.1 percent.

Companies whose net premiums written or net premiums earned and whose direct premiums earned (New York business) are less than $100,000 are included in "Remaining Companies."

GLOSSARY

These tables are prepared by the New York State Insurance Department from data reported in the Insurance Expense Exhibits filed as of December 31 of each year. All caption headings relate directly to similarly described items in the Insurance Expense Exhibit and in Regulation No. 30 pertaining to the Uniform Classification of Expenses.

Individual company data are not printed for a company if, in a given line of business, its countrywide written or earned premiums is less than $100,000 and its New York State premium is less than $100,000. However, the total for such companies has been included as "remaining companies."

Certain groups of affiliated companies file consolidated Expense Exhibits. The data for the entire group is shown in only one of the affiliated companies. Such groups and companies can be found in the appendix at the end of this book.

The following definitions of the terms appearing in this book provide only a general guide. More definitive explanations are contained in the Department's Regulation No. 30 and in textbooks on insurance subjects.

Countrywide and New York State Experience

"Countrywide" data refer to the total business transacted by all domestic and other state (foreign) companies. In the case of alien companies, only the business conducted by the United States branch is reported. Countrywide are on a "net" basis after reinsurance.

"New York State Experience" refers to business written on risks located in New York State. New York State data are on a "direct" basis before reinsurance.

Expenses

Expenses are reported on a form ("Insurance Expense Exhibit") adopted by the National Association of Insurance Commissioners and filed annually by each company on or before May 1. The form calls for the allocation of all operating expenses to specified expense groups and to separate lines of business. The rules for Uniform Classification of Expenses reporting are prescribed by Regulation No. 30 of the New York State Insurance Department. The expense ratios shown in the published tables are described below. Investment expenses are excluded from all of the ratios shown. Expenses do not include Federal Income Tax.

"Expenses (adjusted)" ratio represents the sum of the five expense ratios reported under "Analysis of Expense (Countrywide)." It is designated as "adjusted" because the "Commission and brokerage" ratio and the "Taxes and fees" ratio are on a written premium basis while the remaining three ratios are on an earned premium basis.

The adjusted expense ratio, while it approximates expenses as a percent of written or of earned premiums, recognizes the differing bases underlying the incidence of expenses.

"Loss adjustment" expenses are all expenses incurred in connection with the investigation and adjustment of policy claims, including the allocated share of the operating expenses of the company pertinent to this activity.

"Commission and brokerage" expenses represent payments made or due on a commission basis (percentage of premiums) to agents and brokers for the sale of insurance, and expenses related thereto such as customer servicing.

"Other acquisition" expenses are all expenses other than "Commission and brokerage" expenses incurred in connection with the sale of insurance, including salaries and expenses for soliciting and procuring business, writing policies, collecting premiums, advertising, etc.

"General" expenses are all underwriting expenses incurred other than those allocable to "Loss adjustment," "Commission and brokerage," "Other acquisition" expenses, and "Taxes and fees." General expenses do not include investment expenses.

"Taxes and fees" are all taxes and fees except Federal Income Tax and real estate tax. This includes premium taxes, payroll taxes, licensing fees, expenses of Insurance Department examinations and other related expenses.

Losses

"Incurred losses" are all losses paid during the year plus or minus the net change in reserves set aside for outstanding (unpaid) losses. Loss adjustment expenses are excluded. Losses incurred ratios are based on earned premiums.

"Outstanding losses" represent the estimated amount not yet paid on losses incurred during the current and prior years, including reserves for incurred but not reported claims, claims in the process of settlement or investigation and amounts not yet due on adjusted claims. Loss adjustment expenses are excluded.

Net Gain

"Net gain (adjusted)" is the difference between net premiums earned and the sum of "Incurred losses" and "Expenses (adjusted)." A negative figure indicates an underwriting loss. Net Gain shows results before Federal Income Tax.

Premiums

"Direct premiums" are total premiums on all policies issued by a company. They do not include premiums received from other companies for reinsurance assumed and no deduction is made for reinsurance ceded to other companies.

"Adjusted direct premiums" (shown in Table 22) are "Direct premiums" adjusted in accordance with the following instruction in the Insurance Expense Exhibit:

"Where pooling agreements or similar arrangements exist between companies within a group and where companies operate through pools or associations and each company participates in the expenses on the basis of a fixed percentage, each company's direct premiums for the purpose of this exhibit, shall be adjusted to produce its participation in the aggregate direct premiums of the group and further adjusted by substituting for the actual direct premiums on business written through associations, the participation of the company in the aggregate direct premiums of all members of each such association."

The adjustment of premiums of companies in pools and associations places these data on a comparable basis with companies not so participating, for purposes of Insurance Expense Exhibit reporting.

"Written premiums" are premiums on policies issued by a company during the year regardless of the expiration dates of the policies, less return premiums on policies cancelled or not taken. (Written premiums may be on a direct or a net basis.)

"Earned premiums" are premiums on policies issued for that portion of the policy term which has expired during the year (e.g., for a one-year policy issued on December 1 of the current year, only one-twelfth would be reported as earned during the current year; for a one-year policy issued on December of the preceding year, eleven-twelfths would be earned during the current year.)

Premiums earned for a given year can therefore be computed by adjusting written premiums by the difference between the unearned premium reserve at the beginning and end of the year. The unearned premium reserve is a provision for the unexpired portion of the premiums written during the current and prior years.

"Net premiums" are the premiums retained by the company, net as to reinsurance. They differ from the "Direct premiums" in that they include the premiums received from other companies for reinsurance assumed and exclude the premiums paid to other companies for reinsurance ceded.

Investment gain

"Net investment gain or loss" includes realized, but excludes unrealized, capital gains or losses. It has been allocated by management to lines of business and to surplus in accordance with the method deemed by management to be most appropriate.

Table Notes

The following notes apply to all tables:

All ratios (loss, expense, and income) are expressed in percents.

Columns marked "E" utilize net premiums earned as the base. Columns marked "W" utilize net premiums written as the base.

Incurred loss ratios (New York State experience) that exceed +1,000 or -1,000 percent are printed as +999.9 or -999.9 respectively.

A "*" indicates that a company's ratio reported in its Insurance Expense Exhibit (IEE) differs from a ratio computed by the Department--based on the dollar amounts reported by the company in the IEE--by more than ±1.1 percent.

Companies whose net premiums written or net premiums earned and whose direct premiums earned (New York business) are less than $100,000 are included in "Remaining Companies."
